Date issued:

MANUFACTURE'S SIGNATURE

DAN GALARDE

CORPORATE V.P. OF QUALITY

THESE ARE SOME OF THE NEW FEATURES AVAILABLE WITH PINBALL 2000:

GAME PLAY

The video display allows dynamic interactive features.

The video display allows many playfield devices to occupy the same position at different times in the game.

Video can clearly lead the player through the game, making clear what is happening each time that a target is hit. You see the result at the point of impact with the ball.

The video 'mechanisms' allow for simpler 'real' mechanisms on the playfield. The result is reduced service problems.

ELECTRONICS

The backbox contains a commercial motherboard, housed in a PC style case, and a monitor. The system will become more powerful as new motherboards are introduced.

The Power Driver board is located in the cabinet and is connected to the PC via a standard parallel printer cable. A laptop or a service computer can use this connection for powerful troubleshooting.

The PINBALL 2000 Power Driver board is secured with two screws and has 17 uniquely keyed connectors allowing for easy replacement. The WPC-95 Power Driver board, on the other hand, was secured with nine screws and had 39 connectors.

Each fuse has its own LED indicator.

Blown fuses and burnt out bulbs are shown by built in diagnostics on the video screen.

A PC connector at the coin door allows for advanced diagnostics, (a laptop computer can become a portable test fixture), data transfer and software updates.

The operator may add a low cost modem to the PC for remote data retrieval, an Internet connection and software updates. A revenue sharing system could be implemented on this platform.

SOFTWARE UPDATES

There are no EPROMs in the system. Software updates are done using a PC connected to the front door or via a modem and phone line.

There will be a chip based updated method available for a low-tech customer that is similar to updating a video game hard drive program.

All software resides in the backbox section. The system has been designed such that the software can be updated without uncrating the backbox.

CABINET AND BACKBOX FEATURES

The attendant can gain access to playfield through a key-released front molding. Playfield glass may be removed by location attendant for minor problems) such as trapped balls. Playfield remains locked by passive latch built into coin door.

Computer Case is an easy pull-out drawer in the backbox. This allows for easy access for troubleshooting and service. Entire CPU section may be swapped out in 60 seconds.

Backbox locks provides higher security than previous design and secures CPU case for transit.

CABINET AND BACKBOX FEATURES CONTINUED...

Provision available for CPU case padlock in backbox.

Backglass stores easily over playfield glass and provides reflected image while servicing.

The playfield is at proper playing angle with all leg levelers in their lowest position.

The wiring from the backbox to the cabinet is only a few cables.

Main cable from the cabinet mounted driver board is significantly reduced in length for greater reliability and lower emissions and interference.

The cover for the Power Driver board is hinged to ensure that it is put back in its protective position after service is performed.

DCS II sound system delivers stereo sound directly to the player to enhance game excitement without requiring a high volume level.

CONVERTIBILITY

Operators are able to use the convertibility to rotate their pinball games by moving playfield and a PC board instead of the entire machine. This is possible because of the ease of conversion and the way the devices on the bottom of the playfield are protected by the underside runners.

The playfield has unique runners protecting the parts on the underside of the playfield. These runners provide the following features:

Installation and removal of the playfield is an easy process requiring little physical strength. This ease is enhanced due to the main cable's attachment to the cabinet instead of the playfield.

The devices on the bottom of the playfield are naturally protected in the shipment of these kits.

The playfield may be handled and stored outside of the cabinet without fear of damage to the devices attached to the underside.

REVENGE FROM MARS™

Williams Electronics Games, Inc. reserves the rights to make modifications and improvements to its products. The specifications and parts identified in this manual are subject to change without notice.

PINBALL GAME ASSEMBLY INSTRUCTIONS

It takes two people to assemble a PINBALL 2000 game.

Do not plug in or switch on power to the cabinet until assembly is complete!

It is not necessary to open the computer case to assemble a PINBALL 2000 game. However, should you ever find it necessary to open the case, be sure to replace the computer case cover. Failure to do so will void FCC, UL and CE compliance, and may cause damage to the PC boards in the case. The foam lining of the cover holds the PC boards securely in place and protects them from vibrations that normally occur in a pinball game.

Power: Domestic 120V @ 60Hz
Foreign 230V @ 50Hz
Japan 100V @ 50Hz
Temp: 32°F to 100° F, (0°C to 38°C)
Humidity: Not to exceed 95% relative.

Dimensions: Width: 24" approx.
Length: 48" approx.
Height: 73" approx.
Weight: Backbox: 130 LB approx.
Cabinet: 230 LB approx.

1. Remove all cartons, parts, and other items from the shipping containers and set them aside.
2. The leg levelers, nut, and leg bolts are among the parts in the cash box. Install a leg leveler and nut on each of the front and rear legs. Place the cabinet on a support. Using two leg bolts in each leg attach the rear legs to the cabinet. Next, using two leg bolts in each leg, attach the front legs to the cabinet. See Figure 1.
3. Once the legs are securely attached, remove the support from the cabinet. Adjust the leg levelers so that the cabinet does not wobble.

Figure 1

4. Remove the playfield from the cabinet before trying to attach the backbox. To do this, unlock and open the coin door. Pull the yellow lever, (located to the left of the coin door), to the right. The front molding pops up. Lift the molding from the cabinet. Slide the playfield glass down and lift it off of the cabinet. See Figure 2.

Figure 2

5. Lift the playfield by the support bracket under the bottom arch. Rest the playfield on the top of the cabinet as shown in Figure 3. Close the coin door.

Figure 3

6. Firmly grasp the playfield on the sides and slide it forward (toward you) along the bottom track slide brackets. Do not unplug the cables on the bracket attached to the back of the playfield. Rotate the front of the playfield down and set it on the floor as shown in Figures 4, 5, and 6.

Figure 4

Figure 5

Figure 6

7. Next prepare the backbox. Locate the four mounting bolts and bushings among the parts in the cash box and set them aside. Cut the tie-wrap that holds the 9-pin serial cable, the 25-pin parallel cable and the power/speaker cable to the wood shipping brace. The shipping brace is held in place by two screws located on the left and right sides of the backbox. Remove the screws and shipping brace from the backbox.
8. Stand the backbox upright. Unlock and remove the rear door. Pull the three cables out through the back door opening and let them hang down the rear of the backbox. See Figure 7.

Figure 7

9. With the help of another person, carefully lift the backbox and set it on the cabinet.
10. Line up the four mounting holes in the cabinet with the mounting holes in the backbox. Place a bushing in each of the mounting holes in the cabinet. Fasten the two assemblies together by inserting a bolt through the backbox and into the cabinet in each of the four mounting holes. See Figure 8 below.

Figure 8

CAUTION
FAILURE TO INSTALL the backbox mounting hardware properly can cause personal injury.

11. Slide the three cables back inside the backbox and let them hang down inside the cabinet.
12. Next, connect the cables. *Do not force cables onto connectors. Cables should plug in easily.* The three cables coming from the backbox and going to the cabinet are the 9-pin serial cable, the 25-pin parallel cable and the power/speaker cable. There is one cable from the cabinet that goes to the backbox, it is the ground strap. See Figure 8, on the previous page.

Plug the 9-pin serial cable into the bracket near the coin door and screw it securely in place (see Figure 9 below). Plug the 25-pin parallel cable into the Power Driver board at J100 and screw it securely in place. The power/speaker cable has two connectors, a 2-pin connector for the speakers and a 3-pin connector for power. Plug the speaker cable connector into the 2-pin connector near the speakers, and plug the power cable connector into the 3-pin isolation tap from the transformer, which is also located near the speakers. Be sure to match the wire colors on the speaker and power cables.

Figure 9

The last cable to attach is the ground strap. Remove the four screws holding the backbox rear door. Unlock and remove the rear door. The ground strap is located in the rear of the cabinet. Reach through the rectangle hole and pull the ground strap up. Remove the wing nut from the ring lug located to the left of the rectangle hole. Slip the ground strap loop over the ring lug and secure it in place with the wing nut. Replace and lock the backbox rear door. Replacing the screws is optional.

13. Open the coin door. Carefully, lift the playfield from the front and tip the back of it onto the slides. Slide it back into the cabinet. Be sure that the cables at the back of the playfield are not kinked.
14. Place a level or an inclinometer on the playfield surface. Adjust the leg levelers for proper playfield level (side-to-side).

NOTE: This measurement must be made *ON the playfield, not the cabinet or the playfield cover glass*. Tighten the nut on each leg leveler shaft to maintain this setting.

15. The TRU-PITCH™ level is located on the right shooter rail. This allows the playfield pitch angle to be properly adjusted **WITHOUT REMOVING THE GLASS**. The first line (closest to the front of the game) on the level is approximately 6 degrees. Every line thereafter is approximately another 1/2 degree of pitch. The recommended pitch is 6-1/2 degrees. The NOSE of the bubble should be between the first and second line on the level (see diagram below).

Figure 10

IMPORTANT!

Playfield pitch angle can affect the operation of the plumb bob tilt. The plumb bob weight is among the parts in the cash box. After completion of the desired playfield pitch angle setting, the operator should install the weight and adjust this tilt mechanism for proper operation. The unit is factory installed for a 6-1/2 degree angle. If an adjustment is necessary, loosen the screw at the bottom of the unit. Move the pointer, one groove at a time to the left or the right, depending on the degree desired. Hold the pointer in place and tighten screw.

16. Be sure the **required number** of balls is installed.
17. Replace the playfield glass. Be sure that the PINBALL 2000 logo is in the lower left corner and that the 'smiley' faces are visible. See Figure 11 below. Snap the front molding securely into place. Close and lock the coin door.

Figure 11

18. Plug the line cord into the game cabinet. Match the prongs on the plug with the holes in the receptacle, and push the line cord securely into place. See Figure 12.

Figure 12

19. Move the game into the desired location. Adjust the leg levelers so that the playfield pitch is the recommended 6-1/2 degrees. This places the game in a FIXED position.
20. If a padlock is desired, install the security bar as shown below in Figure 13.

Figure 13

21. Plug the game into a properly grounded outlet.

CAUTION

After assembly and installation at its site location, this game must be plugged into a properly grounded outlet to prevent shock hazard, and to assure proper game operation. DO NOT use a 'cheater' plug to defeat the ground pin. DO NOT cut off the ground pin.

22. **POWERING UP.** With the coin door closed, plug the game in and switch it on. In normal operation the game performs Start-up Tests. Once the Start-up tests have been successfully completed, the game enters the Attract mode.
23. **IMPORTANT:** Fill out and return the registration card.

RAISING THE PLAYFIELD

CAUTION

This game uses ski assemblies to raise and lower the playfield. Be sure the back of the playfield skis slide along the cabinet tracks until the feet hook into the loop at the end of the track.

Before Raising the Playfield:

Be sure there are no balls present in any of the ball-holding playfield devices (i.e. poppers). Raising the playfield with balls present in these locations may cause them to come loose and damage the playfield. Use the "Empty Balls Test" to remove all of the balls from these locations.

To Raise the Playfield:

1. Open the coin door. Remove the front molding and the playfield glass. Lift the playfield by the metal bracket under the bottom arch. Rest it on the top of the cabinet.
2. Close the coin door. Grasp the playfield on the sides and pull it toward you along the track slides. Rotate the front of the playfield up and back toward the backbox.

To Lower the Playfield

1. Rotate the front of the playfield down and push it back, away from you, along the track slides. Rest it on top of the cabinet. Open the coin door.
2. Grasp the playfield by the metal bracket under the bottom arch and lower it back into the cabinet. Replace the playfield glass and the front molding. Close and lock the coin door.

GAME CONTROL LOCATIONS

Cabinet Switches

The ON/OFF SWITCH is on the bottom of the cabinet near the right front leg.

The START BUTTON is a push-button to the left of the coin door on the cabinet exterior. Press the Start button to begin a game, or during the diagnostic mode, to ask for HELP.

Coin Door Buttons

The operator controls all game adjustments, obtains bookkeeping information, and diagnoses problems, using only four push-button switches mounted on the inside of the coin door. The coin door buttons have two modes of operation Normal Function and Test Function.

NORMAL FUNCTION

The SERVICE CREDITS button puts credits on the games that are not included in any of the game audits.

The VOLUME UP (+) button raises the sound level of the game. Press and hold the button until the desired level is reached.

The VOLUME DOWN (-) button lowers the sound level of the game. Press and hold the button until the desired level is reached. See the Adjustment menu to turn the sound down all the way.

The **BEGIN TEST button starts the Menu System operation and changes the coin door buttons from Normal Function to Test Function.

TEST FUNCTION

The ESCAPE button allows you to get out of a menu selection or return to the Attract mode.

The UP (+) button allows you to cycle forward through the menu selections or adjustment choices.

The DOWN (-) button allows you to cycle backward through the menu selections or adjustment choices.

The ENTER button allows you to get into a menu selection or lock in an adjustment choice.

The START BUTTON (p/n 20-9663-16) is not shown on this drawing.
It is located below the service lock.

*The LEVER is part of the LOCK BRACKET ASSEMBLY (p/n A-22996).

** To reset the High Scores, press and hold the BEGIN TEST button.

GAME OPERATION

CAUTION

After assembly and installation at its location, this game must be plugged into a properly grounded outlet to prevent shock hazard, and to assure proper game operation. DO NOT use a 'cheater' plug to defeat the ground pin on the line cord. DO NOT cut off the ground pin.

POWERING UP. With the coin door closed, plug the game in, and switch it on. The game performs Start-up Tests. A test pattern and 'PLEASE WAIT' appears on the screen. The screen changes and 'TESTING' appears on the screen. Once the Start-up tests have been successfully completed the game goes into the Attract mode.

Note: After the game has been on location for a time, the Start-up tests may contain messages concerning game problems.

ATTRACT MODE. During the Attract mode, the screen shows a series of messages informing the player of the recent highest scores.

CREDIT POSTING. Insert coin(s). The screen shows the number of credits purchased.

STARTING A GAME. Press the Start button. A ball is ejected into the shooter lane. Press the Ball Launch button on the cabinet to send the ball onto the playfield and begin game play. If credits are posted, additional players may enter the game by pressing the Start button once for each player, before the end of play on the first ball.

TILTS. Actuating the cabinet slam tilt switch inside the cabinet ends the current game and proceeds to the Game-over mode. With the third closure of the plumb bob tilt switch, the player loses the remaining play of that ball, but can complete the game.

END OF A GAME. All earned scores and bonuses are awarded. If a player's final score exceeds the specified value, the player receives a designated award for achieving the current highest score. A random digit set appears in the display. An award may be given when the last two digits of any player's score match the random digits.

GAME-OVER MODE. The **Game-over** screen shows the high scores and the game proceeds to the Attract Mode.

MENU SYSTEM OPERATION

The System Menu allows you to choose from several menus, which in turn, lead to other menus to choose from. To access the System Menu, open the coin door and press the Enter button. The System Menu appears on the screen. Press either the Up or the Down buttons to move the cursor up or down the screen. Notice how the menu options are highlighted in order. A menu option must be highlighted for it to be selected. To open a System Menu item, (Diagnostics menu, Adjustments menu etc.), press the Enter button when that menu is highlighted. To return to the System Menu (from the Diagnostics menu, Adjustments menu, etc.) press the Escape button at any time. The following outline shows the System Menu and the next lower level of menus available from the System Menu.

DIAGNOSTICS

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Diagnostic menu. Press the Enter button to open the menu when it is selected. Once the Diagnostic menu is open, use the Up and Down buttons to move the cursor and select a test. Press the Enter button to enable the test. Press the Escape button to return to the Diagnostic menu. Press the Escape button a second time to return to the System Menu.

In order to operate the tests that use the +50V or +20V circuits, pull the interlock switch button out. The interlock switch is located on a bracket in the coin door opening.

SWITCH EDGES TEST

Press each of the switches one at a time. The name and number of the switch is on the screen. If a switch other than the one pressed, or no switch at all is indicated, the system has detected a problem with the switch circuit. To return the Diagnostic menu, press the Escape button.

SINGLE SWITCHES TEST

This test isolates a single switch and shows its state in the display. A mechanical switch is 'made' when the display reads closed. An opto switch is 'made' (opto beam broken) when the display reads open. Use the Up or Down buttons to select the switch to be tested. To return the Diagnostic menu, press the Escape button.

DIP SWITCH TEST

This test is used to show the positions of the DIP Switches. To return to the Diagnostic menu, press the Escape button.

SOLENOID TEST

The Solenoid test has three modes -- Repeat, Stop, and Run. Only one solenoid should pulse at a time. The system has detected a problem if more than one solenoid pulses, a solenoid comes on and stays on, or no solenoids pulse during the Repeat and Run modes.

Repeat: The Repeat mode activates an individual solenoid. Press the Enter button to start this test. The name of the first solenoid shows in the display and the corresponding coil pulses. Press the Up or Down buttons to cycle through the solenoids, one at a time. The same solenoid pulses until you press the Up or Down buttons to advance to the next one. To return the Test menu, press the Escape button. To advance to the next test mode, press the Enter button.

Stop: The Stop mode halts the Solenoid test. No solenoids should be active. To return the Test menu, press the Escape button. To advance to the next test mode, press the Enter button.

Run: The Run mode cycles through the solenoids automatically. The display shows the name and number of the solenoid currently being pulsed. To return the Test menu, press the Escape button. To return to the Repeat mode, press the Enter button.

SINGLE LAMP TEST

The Single Lamp test checks each lamp circuit individually. Press the Up or Down buttons to scroll through this test. A lamp should light for each name and number that is displayed. Any other results indicate the system has detected a problem. To return to the Diagnostic menu, press the Escape button.

LAMP ROW/COLUMN

This test allows individual rows and columns in the lamp matrix to be operated. This is useful for troubleshooting wiring and driver problems.

Press the Up and Down buttons to cycles through the different rows and columns. To return to the Diagnostic menu, press the Escape button.

ALL LAMPS TEST

This test causes all the controlled lamps to flash at the same time. Every controlled lamp should flash. Any other results indicate the system has detected a problem. To return to the Diagnostic menu, press the Escape button.

VIDEO TEST

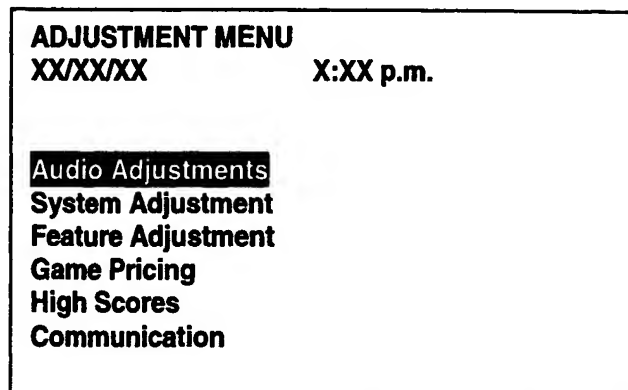

FUSE CHECK

ADJUSTMENTS

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Adjustment menu. Press the Enter button to open the menu when it is selected. Once the Adjustment menu is open, use the Up and Down buttons to move the cursor and select a sub-menu. Press the Enter button to enable the sub-menu and view the next level of functions.

Use the Up and Down buttons to move the cursor and select a sub-menu function. Press the Enter button to enable that function. Use the Up and Down buttons to change the value. Press the Enter button to lock in the new value, or press the Escape button to retain the original value and return to the sub-menu.

Press the Escape button to return to the sub-menu. Press the Escape button a second time to return to the Adjustment menu and a third time to return to the System Menu.

AUDIO ADJUSTMENTS

Power Saver

This adjustment leads to a menu of adjustments for the Power Saver feature.

Clock/Format

This adjustment leads to a menu of adjustments for the Clock feature.

Balls Per Game

A "game" is defined by specifying the number of balls to be played.

Settings: 1 to 10

Factory Setting: 3

Game Restart

When you press the Start button during or after the 2nd ball, the game in progress ends and a new game begins. This adjustment has three settings to determine how to handle this.

Settings: **Never** – Don't allow a new game start until the current game is over.

Slow - Restart if the Start button is pressed continuously for over 1/2 second. This helps to prevent the unintended restart of the game in progress.

Instantly - Restart as soon as the Start button is pressed. When you press the Start button during game over, or during the 1st ball (to add a player), it is always handled instantly.

Factory Setting: Slow

Tournament Play

Equalize random game features and global score values during multi-player games.

Settings: Yes or No

Factory Default: No

Maximum Tickets per Player

The amount of tickets each player can earn.

Settings: 00 to 100.

Factory Default: 25

Special Award

The award a player receives when he/she earns a Special.

Settings:

Factory Setting: Credit

Slam Tilt Penalty

Whether of not the player is penalized for causing a Slam Tilt.

Settings: Yes or No

Factory Setting: No

Tilt Warning

The number of total actuation's of the plumb bob that can occur before the game is "tilted".

Settings: 1 to 10

Factory Setting: 3

System Adjustments Continued...

Allow Chase Ball

The Chase Ball feature will attempt to keep a game operational in the event that a ball becomes stuck on the playfield. After a number of unsuccessful ball searches, the game software will end the player's current ball, give a bonus award, then serve a new ball (or end the game if that was the last ball in the player's game). This ball 'chases' the stuck ball on the playfield and will hopefully knock it loose. Setting this adjustment to NO will revert to the previous behavior of searching endlessly until the stuck ball becomes freed, or the machine's power is turned off and back on.

Settings: Yes or No

Factory Setting: Yes

Midas Enabled

This enables the second serial port to work with the Midas Security Unit.

Default H.S.T.D. 2	30,000,000
---------------------------	-------------------

Default H.S.T.D. 3	20,000,000
---------------------------	-------------------

Default H.S.T.D. 4	10,000,000
---------------------------	-------------------

The first through fourth Default High Score values. The game automatically restores this value when the "High Score Reset Every" value is reached.

Settings: 00 to 200,000,000

Factory Settings: Default H.S.T.D. 1 = 40,000,000

Default H.S.T.D. 2 = 30,000,000

Default H.S.T.D. 3 = 20,000,000

Default H.S.T.D. 4 = 10,000,000

BOOKKEEPING

Audits Cannot Be Set, They Can Only Be Cleared.

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Bookkeeping menu. Press the Enter button to open the menu when it is selected. Once the Bookkeeping menu is open, use the Up and Down buttons to move the cursor and select a sub-menu. Press the Enter button to enable the sub-menu and view the next level of functions.

Use the Up and Down buttons to move the cursor and select a sub-menu function. Press the Enter button to enable that function. Use the Up and Down buttons to reset the value to zero. Press the Enter button to lock in the zero value, or press the Escape button to retain the original value and return to the sub-menu.

Press the Escape button to return to the sub-menu. Press the Escape button a second time to return to the Bookkeeping menu and a third time to return to the System Menu.

UTILITIES

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Utilities menu. Press the Enter button to open the menu when it is selected. Once the Utilities menu is open, use the Up and Down buttons to move the cursor and select a function. Press the Enter button to enable the function.

Use the Up and Down buttons to change the function setting. Press the Enter button when the desired setting is displayed and a 'countdown' screen appears. Press the Enter button during the 'countdown' to lock in the new setting. Or, wait for the 'countdown' to complete and the new setting is locked in automatically. Press the Escape button, during the 'countdown' to retain the original setting and return to the Utilities Menu.

Press the Escape button to return to the Utilities menu. Press the Escape button a second time to return to the System Menu.

SYSTEM INFORMATION

The System Information utility displays game specifications. It cannot be cleared.

SHOW SHELL WINDOW

This is used to show the system terminal window. It is for diagnostic use.

SET LOCATION I.D.

This utility allows the operator to show the game's location on printouts. Press the Enter button to open the utility. Use the Up and Down buttons to move the cursor and select letters. Press the Enter button to lock in desired letters.

UPDATE GAME CODE CODE (You will typically want to run the latest update).

Use this menu to enable or disable the update game code (stored in the PRISM board FLASH memory).

Enable Updated Code

If the update game code is enabled, the system will run the last version of update game code installed (REFERENCE SOFTWARE UPDATES IN NEW FEATURES OF PINBALL 2000).

Disabled Updated Code

If the update game code is disabled, the system will run the version of game code located in the original PRISM board ROMs.

WARNING TO THE OPERATOR.

In early releases of the Revenge from Mars game code ROMs, DO NOT perform the Disabled Updated Code. Doing so will cause your game to run in Free Only Mode and the UPDATE GAME CODE utility menu will not allow the updated game code to be enabled.

If you accidentally disable the update game code, do one of the following:

- 1) Plug a keyboard into the keyboard port (located near the computer case in the backbox) or,
- 2) Plug a computer terminal into the COM 1 port (located near the coin door).

Then, at the command (%) prompt type the following:

% fupdate enable

to re-enable the Updated Game Code.

Note: This operation takes about 15 seconds to complete.

CLEAR AUDITS

Press the Enter button to clear the all of the audits.

CLEAR COINS

Press the Enter button to clear the Earnings Audits.

RESET HIGH SCORES

Press the Enter button to clear the High Score to Date Table.

SET CLOCK

Press the Enter button to activate the clock. Use the Up and Down buttons to change the time, then press the Enter button to lock in the time.

FACTORY ADJUSTMENT

Press the Enter button to restore the adjustments to factory settings.

FACTORY RESET

Press the Enter button to restore the adjustments to their factory setting, clear the Audits, Reset the High Score, and the Location I.D.

INSTALL PRESETS

Press the Enter button to open the utility. Use the Up and Down buttons to move the cursor and select from the available Presets. When the desired Preset is selected, press the Enter button to lock it in. Press the Escape button, during the 'countdown' to retain the original setting and return to the Utilities Menu.

CLEAR CREDITS

Press the Enter button to clear the game Credits.

PRINTOUTS

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Printouts menu. Press the Enter button to open the menu when it is selected. Once the Printouts menu is open, use the Up and Down buttons to move the cursor and select a function. Press the Enter button to enable the function.

Press the Escape button to return to the Printouts menu. Press the Escape button a second time to return to the System Menu.

LANGUAGE

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Language menu. Press the Enter button to open the menu when it is selected. Once the Language menu is open, use the Up and Down buttons to move the cursor and select a language. Press the Enter button to enable that language.

Press the Escape button to return to the Language menu. Press the Escape button a second time to return to the System Menu.

ROUTINE MAINTENANCE INFORMATION

♦ **CLEANING**

Good game action and extended playfield life are the results of regular playfield cleaning. During each collection stop, the playfield glass should be removed and thoroughly cleaned using only a non-abrasive sprayed liquid glass cleaner and a soft cloth. The playfield should be wiped off with a clean, lint-free cloth. The game steel balls should be cleaned and inspected for any chips, nicks, or pits. Replace any damaged balls to prevent playfield damage.

Regular, more extensive, playfield cleaning is recommended. However, avoid excessive use of water and caustic or abrasive cleaners because they tend to damage the playfield surface. Playfield wax (or any carnauba based wax), or polish may be used sparingly, to prevent a buildup on the playfield surface. Do not use cleaners containing petroleum distillates on any playfield plastics because they may dissolve the plastic material or damage the artwork.

♦ **GLASS PARTS**

Wear protective gloves and use both hands when carrying or moving parts made of glass. Glass pieces can fly eight feet (two meters) or more from the point of impact.

SERVICE INFORMATION

Only trained personal should service the game. Always turn off power and unplug the game before attempting any service!

♦ **HIGH VOLTAGE CONSIDERATIONS**

CRTs and their power supplies can retain energy for long periods of time after the power has been turned off. This is especially true when a defective circuit prevents a normal discharge. Connect a very well insulated ground strap to the metal chassis. Slide the free end of the strap under the CRT anode cap until contact is made. Wait two minutes for charge recovery, then discharge the anode a second time.

♦ **RADIATION**

The high voltages used in the Video Monitor Assembly are capable of generating X-rays under fault conditions. Do not substitute high voltage components or modify the circuit without factory authorization. Follow the manufacturer's directions for measuring and adjusting the CRT anode voltage.

♦ **BATTERY**

Note the position of the battery. Gently lift the contact arm to release tension. Do not bend the arm. Slide the battery out of it holder. To reinstall the battery, orient the cell near the holder and slide it under the contact arm. Do not force the battery into the holder.

CAUTION

Danger of explosion if battery is incorrectly replaced. Replace with only the same or equivalent type recommended by manufacturer. Do not attempt to recharge these batteries. Avoid direct shorts across terminals or from terminals to ground. Dispose of used batteries according to manufacturer's instructions.

◆ MEMORY

The ROM chips contain the computer operating instructions. Memory devices are very sensitive to static charges. Use grounding precautions when handling these parts.

To remove a ROM chip from its socket, carefully note its position and then lift the chip using a chip extraction tool. To reinstall a ROM, place the chip over its socket so that the notch in the chip lines up with the silkscreen on the board, and press down firmly to seat. Do not force the chip into the socket. Do not bend the pins under the chip.

CAUTION

Use wrist straps, conductive mats or other methods of safely discharging static electricity. Hold all integrated circuits by their packages and not by the metal pins. Extractor and insertion tools are recommended to avoid bent or broken pins caused by excessive force.

◆ POWER SUPPLY

Unlock and remove the backbox rear door. Unplug the IEC cord and remove the four outer screws surrounding the power supply that secure it to the case. See the drawing below.

Rear view of the computer case

Unlock and remove the backglass and the translite. Unscrew the two screws on either side of the power switch. Grasp the computer case from the front and slide it toward you. Let it hang in front of the backbox, see the drawing below.

SLIDE THE COMPUTER CASE FORWARD AND REST IT ON THE MONITOR BRACKET.

Side View of Backbox

Open the top of the computer case. Unplug the cable harnesses leading from the power supply; one plug is going to one connector on the power amp and two plugs are going to one connector on the CPU board. Lift the power supply out of the computer case.

NOTICE

Always replace the computer case cover. Failure to do so will void FCC, UL and CE compliance, and may cause damage to the PC boards in the case. The foam lining of the cover holds the PC boards securely in place and protects them from vibrations that normally occur in a pinball game.

◆ **GLASS PARTS**

Wear protective gloves and use both hands when carrying or moving parts made of glass. Fluorescent tubes and CRTs will usually implode if broken. Glass pieces can fly eight feet (two meters) or more from the point of impact.

◆ **FLUORESCENT TUBE, STARTER, OR FLUORESCENT LIGHT ASSEMBLY**

Remove the backglass and translite. Remove both plastic lamp locks. Grasp the bulb at each end and give it a quarter turn. Gently pull the bulb straight out to remove it from its socket. The starter also requires a quarter turn for removal. Do not force the bulb or starter during reinstallation. Clean the bulb to remove fingerprints and dust, then reinstall the translite and backglass.

To remove the entire light fixture, remove the lamp locks and the bulb as described above. Disconnect the fluorescent light assembly connector from its power cable. Remove the screws that hold the assembly to the cabinet, then lift out the assembly.

If you drop a fluorescent tube or a CRT and it breaks, it will implode! Use care in handling.

◆ **CIRCUIT PROTECTION**

To avoid equipment damage, any replacement fuse must match the original in fuse type, voltage rating, and current rating. Do not use fuses with different time delay characteristics.

◆ **MONITOR**

Unlock and remove the backbox rear door. Disconnect all of the cables going to the monitor. Remove the four flange nuts securing the monitor's mounting brackets to its mounting panel. **CAREFULLY**, Pull the monitor from the backbox. Clean the face of the monitor before reinstalling it.

CAUTION

THE VIDEO MONITOR IS HEAVY, WITH MOST OF THE WEIGHT TOWARD THE FRONT OF THE ASSEMBLY. Be sure it is firmly supported as it is removed from the cabinet. The monitor does require isolation from the A.C. line voltage in normal operation. When operating outside the backbox or servicing the monitor on a test bench, **YOU MUST ISOLATE THE MONITOR FROM LINE VOLTAGE WITH A TRANSFORMER. THE MONITOR MUST BE POWERED AT 110V.**

◆ **LUBRICATION**

The two main lubrication points of the Ball Release mechanism are the pivots for the arm. The mechanisms of other playfield devices are somewhat similar to the Ball Release, and have the same lubrication requirements. A medium viscosity oil (switch target grease) is satisfactory for these devices.

Because of the functional design (arm-actuated via solenoid plunger operation), the pivot points of the Left and Right Kickers ("Slingshots") all require lubrication as a regular servicing procedure. Lubrication to ensure proper operation also applies to the target blades of the Drop Targets. MBI Instrument Grease, also known as Drop Target Switch Lubricant, with a Williams' part number of EI165, is a recommended lubricant.

◆ **SWITCH CONTACTS**

Playfield Switches. For proper game operation, switch contacts should be free of dust, dirt, contamination, and corrosion. Blade switch contacts are plated to resist corrosion. Cleaning blade switch contacts requires gentle closing of the contacts on a clean business card or piece of paper, and then pulling the paper about 2 inches, which should restore the clean contact surface. Adjust the switch contacts to a 1/16-inch gap.

Switch Contacts Continued...

Flipper Switches. This game uses the Fliptronic II Electronic Flipper System. The End-of-Stroke switches are NORMALLY OPEN. The switch should close when the flipper is energized. All E.O.S. switches are gold flashed computer grade leaf switches. Only low computer current is carried through these switches. DO NOT FILE or abrasively clean these switches! DO NOT REPLACE these switches with the tungsten high current switches, as intermittent operation could occur.

NOTE: *Unlike the old style of flipper, an E.O.S. switch failure does not harm the flipper. The game notifies the operator that the switch is misadjusted in the test report, but continues to play. The E.O.S. switches are a means by which the new electronic flippers feel and play with all of the subtleties of the old flippers.*

EPILEPSY WARNING

A very small portion of the population has a condition which may cause them to experience epileptic seizures or have momentary loss of consciousness when viewing certain kinds of flashing lights that are present in our daily environment. These persons may experience seizures while watching some kinds of television pictures or playing certain video games. People who have not had any previous seizures may nonetheless have an undetected epileptic condition.

If you or anyone in your family has experienced symptoms linked to an epileptic condition (e.g., seizures or loss of awareness), immediately consult your physician before using any video games.

We recommend that parents observe their children while they play video games. If you or your child experience the following symptoms: dizziness, altered vision, eye or muscle twitching, involuntary movements, loss of awareness, disorientation, or convulsions, DISCONTINUE USE IMMEDIATELY and consult your physician.

F112	T5.0A	250V	5731-14046-00	18VAC Lamp Matrix B

LINE FUSE

Location	Value		Part Number
Foreign	T4.0A	250V	5731-14530-00
Domestic	T5.0A	250V	5731-14046-00

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

SECTION TWO

PARTS INFORMATION

**Items listed as Associated Parts are not sold as part of the main assembly.
Associated Parts are only sold separate.**

50070-CAB **Cabinet Assembly**

50070-CAB

Cabinet Assembly Parts List

<u>Item</u>	<u>Part Number</u>	<u>Description</u>
1	04-12480.4	Cabinet
2	01-11400-1	Leg Mounting Bracket (x4)
3	A-19514-6	Leg Assembly – Black Ridge (x4)
4	08-7377	Leg Leveler/Adjuster (x4)
5	01-15132-1	Playfield Slide Track – Right
6	04-12610	Stay Arm
7	A-22996	Lockdown Bracket Assembly
8	5555-16059-00	Speaker, 6.5" Woofer, 4Ω
9	A-22966	Power Control Box Assembly
10	04-12596.1	Drip Plate
11	5610-15930-00	Transformer Assembly
12	A-22998	Driver Board Cover Assembly
13	A-23299	Driver Board Back Plate Assembly
14	04-12329	Power Driver Board PCB Assembly
15	03-10011	Cover Stop Tube
16	09-96032-33	Coin Door – USA
17	20-10690	Hand Molding Lock
18	A-22984	Flipper Button Assembly (x2)
19	20-10696	Push Button w/Switch – <i>START</i> (Yellow)
20	01-15184	Launch Button Bracket
21	20-10692-1	Push Button w/Switch – <i>LAUNCH</i> (Red)
22	A-23024	Coin Door Interlock Switch Assembly
23	A-22964	Coin door Interface PCB Assembly & Spacer
24	A-17195-2	Tilt Switch Assembly w/Cable
25	04-10346.1	Tilt Mechanism Assembly
26	20-6502-A	Plumb Bob
27	A-23139	4-Ball Cash Box Assembly
28	A-22997	Hand Molding Assembly
29	A-22976-1	Side Molding Assembly (x2)
30	04-12739.1	Tinted Playfield Glass Assembly
31	03-8091	Rear Molding
32	01-15214	Hole Cover
33	01-15212	Cabinet Corner Bracket
34	01-14085.1	Hasp Hinge Bracket
35	01-14086.1	Hasp Staple Bracket

Miscellaneous Parts: (Not Shown)

<u>Part Number</u>	<u>Description</u>
01-15132-2	Playfield Slide Track – Left
04-12628.2	Safety Pin Bracket
01-15136-1-2	Lock Plate
*	Cordset
20-6500	Steel Ball, Ø1-1/16" (x4)
01-6389-1	Cash Box lock Bracket
01-12352	Clip Bracket
4322-1125-40	3/8 x 16 Hex Acorn Head Leg Bolt
01-14084.2	Slotted Hasp Plate

Cabinet Cables:

<u>Part Number</u>	<u>Description</u>
H-22740-2.1	Cabinet Cable
H-22740-1.2	Cabinet Cable
H-22736	Secondary power Cable
H-22737-2	Cabinet Power/Speaker Cable
H-22955	Cabinet Switch/Lamp Cable

* See Power Interface/Cordset Application Chart on page 2-31

50070-BB

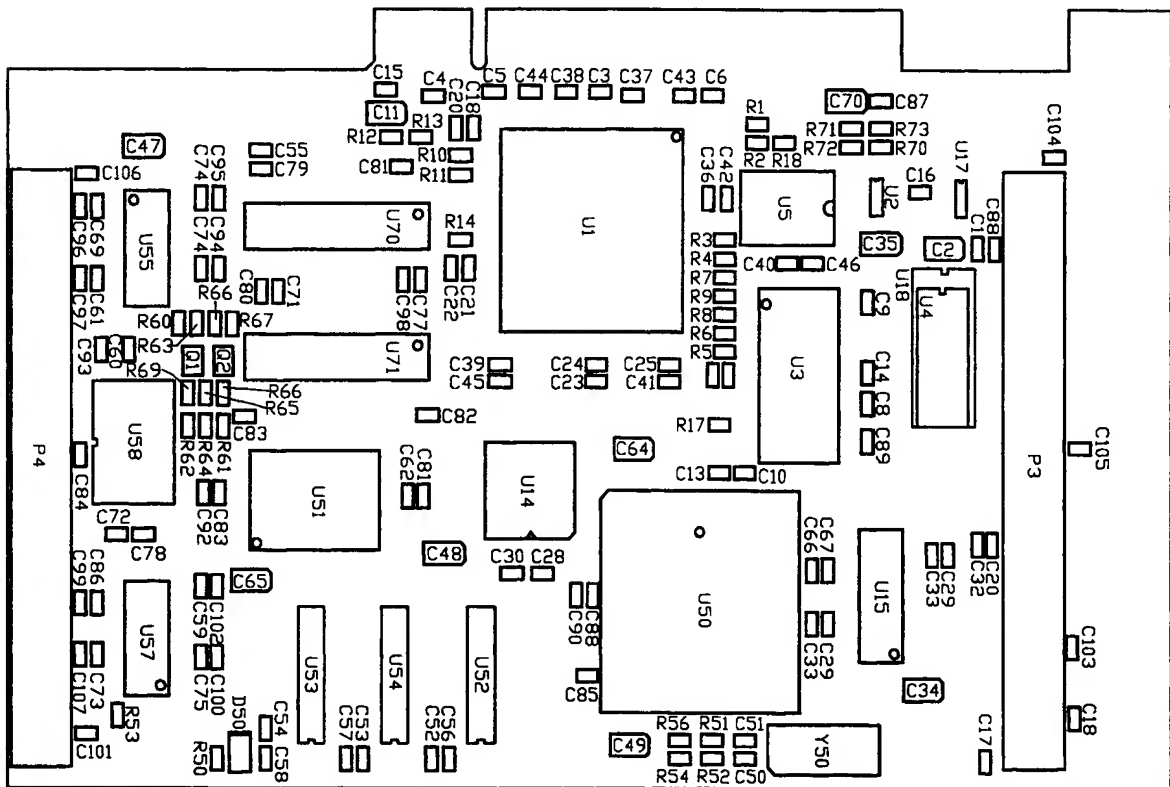

Back Box Assembly

<u>Item</u>	<u>Part Number</u>	<u>Description</u>	<u>Item</u>	<u>Part Number</u>	<u>Description</u>
1	04-12489.4	Back Box	15	24-8809	Fluorescent Lamp 15W, 18"
2	A-22982	Back Boor Assembly	16	04-12752	Ballast Mounting Bracket
3	01-15131	Door Channel	17	A-23155	Ballast Assembly
4	03-9992	Knob	18	A-23160	CPU/AC Power Cable
5	A-22981	Lock & Plate Assembly	19	H-22737-1	AC/Speaker Cable
6	01-15134	Front Lock Cam	20	20-10583	Extension Cable db09 – 10ft
7	A-22975-50070	Marquee Assembly	21	20-10584	Extension Cable db25 – 10ft
8	04-12607.1	Speaker Grill Bracket	<u>Miscellaneous Parts:</u>		
9	04-12606.1	Speaker Grill	<u>Item</u>	<u>Part Number</u>	<u>Description</u>
10	5555-16223-00	Speaker - 4Ω, 25W	22	11-1464	Back Box Shipping Brace
11	5675-16058-02	Monitor – 19"	23	5556-15272-00	Ferrite
12	01-15130.2	Computer Case Mounting Bracket	*24	02-4352-2	Pivot Bushing
13	A-22724	Computer Case Assembly	*25	4322-10228-12	CS 3/8-16 x ¾ Button Head – Nylon Patch
14	A-22980	Fluorescent Lamp Assembly	*26	4700-00111-00	FW .390 x .875 x .062

04-12602
Prism PCB Assembly

<u>Designator</u>	<u>Part Number</u>	<u>Description</u>
R1-R14, R17, R18, R52-R54, R56, R65, R66, R69-R73	5020-14156-00	Resistor, 10K Ω , 5%, 1/10W, R0805
R50	5020-14160-00	Resistor, 330 Ω , 5%, 1/10W, R0805
R62, R63, R64, R67, R68	5020-14152-00	Resistor, 100 Ω , 5%, 1/10W, R0805
C2, C11, C34, C35, C47, C48 C49, C64, C65, C70	5051-14151-00	Capacitor, 10 μ f, 16V \pm 20%, SMD TANT
C50, C51	5052-14149-00	Capacitor, 22pf, 100V 10%, SMD
C1, C7-C10, C17, C19, C21 C24-C29, C36-C40, C52-C55, C67, C90-C100	5052-14164-00	Capacitor, .01 μ f, 50V 20%, SMD
C3-C6, C12-C16, C20, C22, C23, C41-C46, C101-C107	5052-14165-00	Capacitor, .1 μ f, 50V 20%, SMD Z5U
C18, C30-C33, C56-C63, C66, C68, C69, C78-C89	5052-14368-00	Capacitor, 22pf, 100V 10%, SMD
Q1, Q2	5160-16056-00	Transistor, NPN 2N3904 SC70
U15	5283-16051-00	IC, Bus Transceiver, 74FCT162543T
U55, U57	5285-14601-00	IC, 74FCT162245
U4	5340-16204-00	IC, SRAM, 32K x 8, 70ns, SOP28
U2	5345-16049-00	IC, EE Serial PROM
U58	5345-16053-00	IC, Flash 8Mbit TSOP48
U3	5345-16196-00	IC, Flash EEPROM, 28F320J5 SSOP
U5	5521-16050-00	OSC, 30MHz SMT
U17	5432-16052-00	IC, NVRAM Controller SOIC8
U50	5400-15450-00	ADSP-2104KP-40
U51	5410-14590-00	IC, SDR ASIC Video
U52, U53, U54	5349-14606-00	IC, SRAM, 32K x 8 – 15, 28PSQJ
U1	5430-16048-00	IC, PCI Bus Interface, PCI9502
U14	A-23290	IC, CPLD U14 Assembly
Y50	5520-16054-00	OSC, 16MHz Crystal SMT
D50	5671-14653-00	LED, Yellow SMD
P3, P4	5792-16057-00	Connector, Dual Row 2 x 40 SMT

2-6

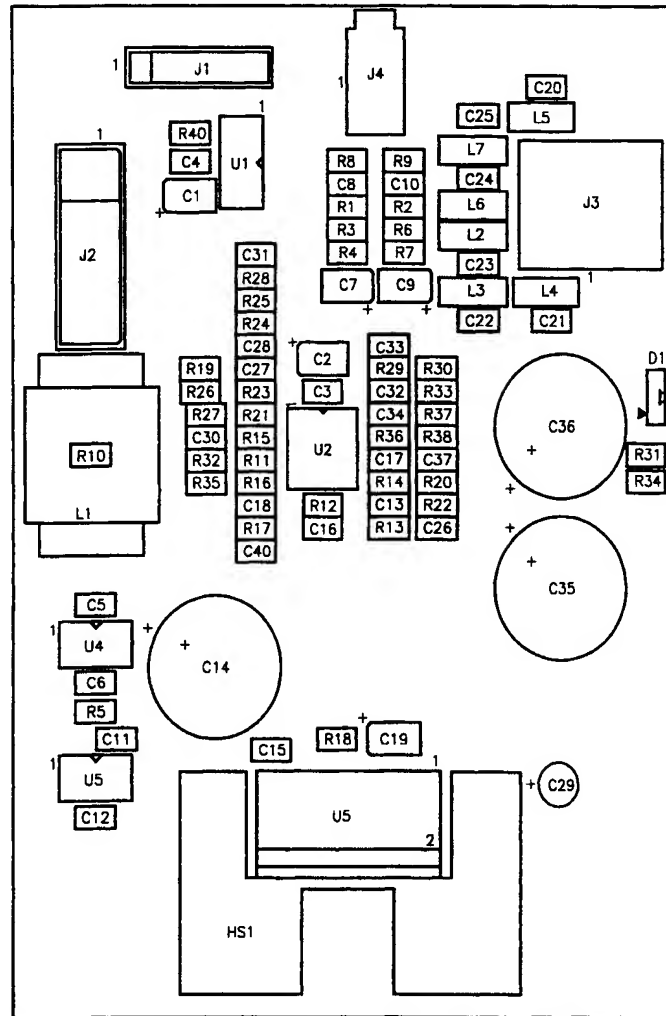

Power Driver Board Parts List

Part Number	Description	Designator
5043-08996-00	Capacitor, 0.1µf, 50V ±20% Axial	C1, C2, C8-C54, C63-C70, C73, C85-C88, C108-C113, C117-C119, C126, C127
5040-13098-00	Capacitor, 4.7µf, 35V ±20%	C3, C83
5040-09365-00	Capacitor, 1µf, 63V +50%-10% Axial	C4
5048-11029-00	Capacitor, 100pf 50V ±5% Axial	C5-C7
5040-15413-00	Capacitor, 10000µf, 35V, 25mm	C55-C58, C60, C61
5040-09537-00	Capacitor, 100µf, 100V ±20% Radial	C59
5040-13102-00	Capacitor, 470µf, 35V ±20% Radial	C62
5048-11030-00	Capacitor, 470pf, 50V Axial	C71, C72, C74-C82, C84, C89, C90-C107, C114-C116, C120-C125
5070-08919-00	Diode, 1N4148, 150mA	D1-D4, D53-D84
5070-09054-00	Diode, 1N4004, 1.0A	D5-D28, D45, D48, D51, D52
5070-14526-00	Diode, P600G, 6A, 400 PIV	D29-D44, D46, D47, D49, D50
5733-14528-00	Fuse Holder, 5x20mm, 10A	FH100-FH112
5731-14530-00	Fuse, 5x20mm, T4A, 250V	F100, F101, F102, F103, F104, F105, F106, F107, F108, F109
5731-14529-00	Fuse, 5X20mm, T6.3A, 250V	F110
5731-14046-00	Fuse, 5x20mm, SB T5A	F111, F112
5705-14562-00	Heatsink, 10-220 Wave Sol 287	HS1
5791-16065-00	25 Pin D-SUB Connector, R/A PCB Mount	J100
5792-13223-09	9 Pin Female, .084 MLX	J102, J101
5792-13223-04	4 Pin Female, .084 MLX	J103
5792-13223-06	6 Pin Female, .084 MLX	J104
5792-13223-12	12 Pin Female, .084 MLX	J105
5791-13356-18	Header-PCB Mount, 0.165 center 18P	J106, J107
5791-13356-16	Header-PCB Mount, 0.165 center 16P	J108, J109
5791-13356-24	Header-PCB Mount, 0.165 center 24p	J110, J111
5791-13356-20	Header-PCB Mount, 0.165 center 20p	J112
5791-13356-10	Header-PCB Mount, 0.165 center 10P	J113
5791-13356-14	Header-PCB Mount, 0.165 center 14P	J114
5791-13356-22	Header-PCB Mount, 0.165 center 22P	J115, J116
5791-13356-08	Header-PCB Mount, 0.165 center 8P(N)	J117
5791-13830-03	3H Straight Square Pin, .100 Solid Tab	J118
5792-15928-18	Connector, 18 Pin, 22-02-7183 Top EN	J119
5580-12782-00	Relay DPDT 12VDC	K1
5671-13732-00	LED, Display Red, T1¼	LED1-LED15, LED17
5190-10270-00	Transistor, 2N3906 PNP	Q1, Q2
5162-12635-00	Transistor, Tip 102	Q3, Q4, Q7, Q8, Q11, Q12, Q15, Q16, Q19, Q20, Q23, Q24, Q27, Q28, Q31, Q32
5192-12428-00	Transistor, Tip 107	Q5, Q6, Q9, Q10, Q13, Q14, Q17, Q18, Q21, Q22, Q25, Q26, Q29, Q30, Q33, Q34
5220-15710-00	Transistor-FET, STP20N10L, N-Channel	Q35-Q70
5160-10269-00	Transistor, 2N3904, NPN	Q71
5019-09669-00	SIP Resistor, 1KΩ, 9R 10, 5%	RP14
5019-16328-00	SIP Resistor, 2.2KΩ, 9R 10P, 5%	RP19
5019-10661-00	SIP Resistor, 10KΩ, 9R 10, 5%	RP1-RP13, RP15-RP18, RP20-RP23
5010-13517-00	Resistor, 15Ω, 1/4W,	R247
5010-13594-00	Resistor, 1kΩ, 1/8W, 5% Film	R1, R22, R23, R31-R34, R51, R52, R61, R62, R71, R72, R81, R82, R99, R100, R109, R110, R119, R120, R121, R124, R191, R193, R194, R197, R201, R204, R205-R215, R217-R244
5010-13365-00	Resistor, 4.7kΩ, 1/8W, 5%	R2
5010-13366-00	Resistor, 470Ω, 1/8W, 5%	R3, R4, R7, R8, R9, R136-R171
5010-13368-00	Resistor, 3.9kΩ, 1/8W, 5%	R5
5010-09160-00	Resistor, 220Ω, 1/4W, 5%	R6, R11, R172, R190, R195, R196, R198, R200
5010-14395-00	Resistor, 6.8kΩ, 1/8W, 5%	R10, R284, R289, R291
5010-13593-00	Resistor, 10kΩ, 1/8W, 5% Film	R12, R21, R25-R28, R29, R43-R50, R91-R98, R134, R135, R192, R199, R245, R248-R282
5010-13364-00	Resistor, 33Ω, 1/8W, 5%	R13-R20, R24, R30, R133, R174, R216
5010-09358-00	Resistor, 1kΩ, 1/4W, 5%	R35, R36, R53, R54, R65, R68, R75, R78, R85, R88, R103, R106, R115, R116, R127, R128
5010-13372-00	Resistor, 220Ω, 1/8W, 5%	R37, R39, R55, R57, R63, R66, R73, R76, R83, R86, R101, R104, R111, R113, R122, R125, R283
5010-12427-00	Resistor, 22Ω, 1W, 5%	R38, R40, R56, R58, R64, R67, R74, R77, R84, R87, R102, R105, R112, R114, R123, R126
5010-08992-00	Resistor, 560Ω, 1/4W, 5%	R41, R42, R59, R60, R69, R70, R79, R80, R89, R90, R107, R108, R117, R118, R131, R132
5010-14093-00	Resistor, 0Ω, 1/8W, 5%	R246
5010-09999-00	Resistor, 2KΩ, 1/4W, 5%	R175, R180, R186-R189
5010-14711-00	Resistor, 10kΩ, 1W, 5%	R176-R179, R181-R185
5010-13595-00	Resistor, 2.7kΩ, 1/8W, 5% Film	R202
5010-13843-00	Resistor, 22kΩ, 1/8W, 5% Film	R203
5010-13841-00	Resistor, 47kΩ, 1/8W, 5%	R285-R290, R292-R295
5011-13292-00	Resistor, 330Ω, 2W, 5%	R296-R298
5645-12554-00	Switch DIP, 4 Position	S1
5824-09248-00	Test Point #1502-1	TP5, TP6
5431-10449-00	IC, 555 Timer	U1
5315-12812-00	IC, 74HCT138, 3 to 8 Decoder	U2, U4, U5, U6
5315-12813-00	IC, 74HCT245, Octal Transceiver	U3
5315-13079-00	IC, 74HCT574, Octal D-Latch	U7, U26, U28-U32, U34, U44
5281-09487-00	IC, 74LS74, Dual D F/F	U8-U10, U13-U16, U19, U20
5370-12272-00	IC, LM339, Quad Comp	U11, U12, U17, U18, U25, U37, U39, U40, U42, U43, U48, U49, U50, U51, U55, U56, U57
5315-12821-00	IC, 74HCT240, Octal Buffer	U21-U23, U38, U41, U46, U47, U52-U54
5162-12422-00	Trans, ULN 2803 Oc-Drl	U24, U27, U33, U35, U45
5250-09157-00	Reg, 7805, 1.0A, 5V	U36
5311-12538-00	IC, 74HC14, Hex S-T-	U58
5671-12993-00	LED, Green, 5mm, T1¼ Diffused	LED16
5070-09266-00	Diode, 1N5817, 1.0A, Schottky	D85, D86
DNP	Do Not Populate	TP1-TP4, TP7, RC1, CL1-CL8
MRD	Missing Reference Designators	R173, RP24-RP27, C126, R129, R130

19	03-7066-5	Coil Tubing

Associated Parts: (Not Shown)

23-6695	Flipper Ring
20-10110-5	Flipper Bat w/Shaft

Notes...

- Each Flipper Assembly is mounted beneath the playfield, in conjunction with the Plastic Flipper & Shaft, and Flipper Rubber on the upper side of the playfield.
- With the flipper, in the non-activated position, the E.O.S. Switch contacts must have a gap of .062 (± 0.015) inch. When flipper is activated switch must close.
- Any adjustment of the E.O.S. switch must be made at a minimum distance of 0.25 inch from the switch body.
- Longer blade of E.O.S. switch must be made straight. Gap adjustment is done by adjusting shorter blade.
- All moving elements of the assembly must operate freely without any evidence of binding.
- Apply Loctite™ 245 when reattaching screws to the Flipper Stop Assembly, the Solenoid Bracket, and the Flipper Bushing.

B-9414-6

Jet Bumper Assembly

(Two B-9414-6 assemblies required. One to be used in conjunction with associated part number 03-8254-9, item 8, and the other to be used with item 9, part number 31-3437-24.)

Item	Part Number	Description
1	A-4754	Bumper Ring Assembly
2	03-6009-A5	Bumper Base
3	03-6035-7	Bumper Wafer – Black
4	03-7443-5	Bumper Body
5	10-7	Spring
6	24-8776	Wedge Base Socket
7	24-8768	Bulb #555 (6.3V, 0.25A)

Associated Parts

Item	Part Number	Description
8	03-8254-9	Jet Bumper Cap, Red
9	31-3437-24	Playfield Plastic (Ref. Only)

Wiring Diagram for the Ball Trough Assembly Opto Switches

This diagram shows the opto switches in the Ball Trough Assembly only. See page 3-21 for the individual playfield opto switches.

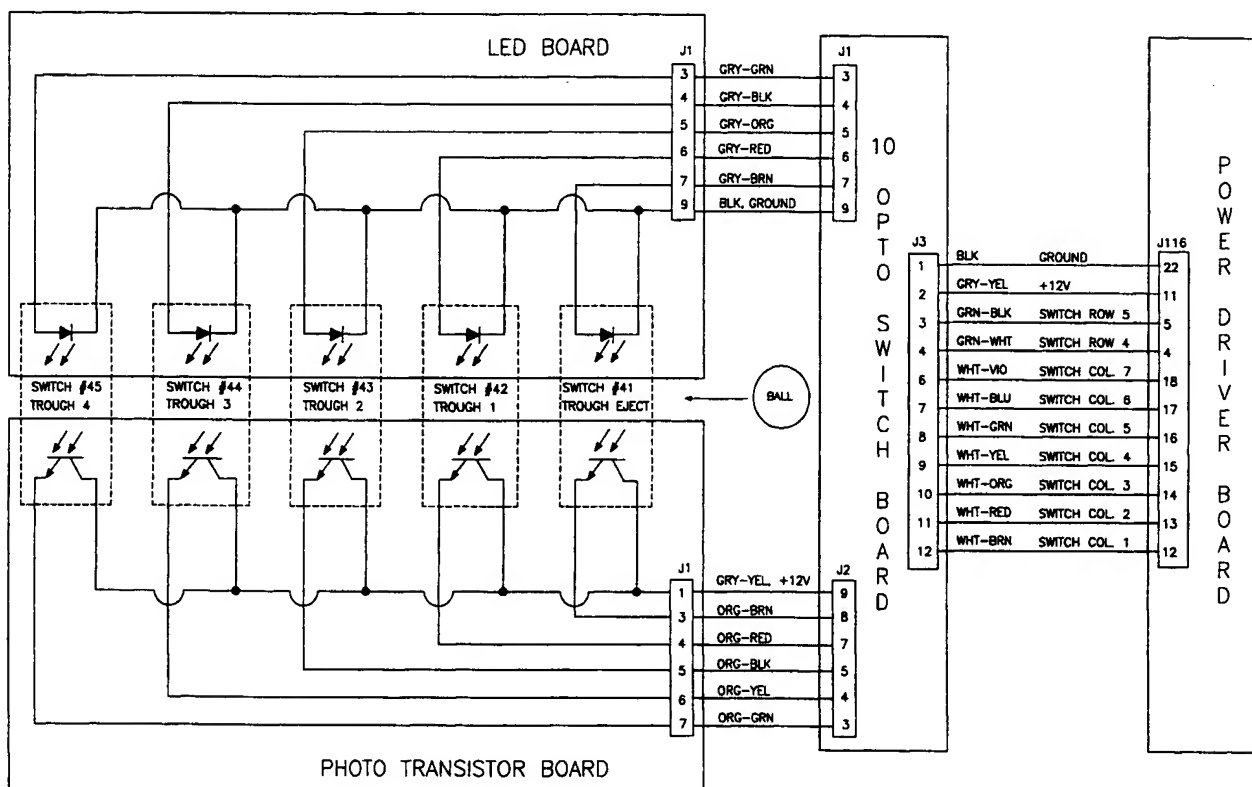

The Ball Trough Assembly opto switches are:

Switch #41	Trough Eject
Switch #42	Trough Ball 1
Switch #43	Trough Ball 2
Switch #44	Trough Ball 3
Switch #45	Trough Ball 4

The Ball Trough Assembly opto switches use a green Ball Trough LED board (P/N A-18617-1), and a blue Ball Trough Photo Transistor board (P/N A-18618-1).

OPTO SWITCH OPERATION:

The ball rolls between the Ball Trough LED board and the Ball Trough Photo Transistor board and breaks the beam. The broken beam 'makes' the switch.

Typical Circuit Diagram

LED BOARD
Transmitter
1.0–1.4 volts

PHOTO TRANSISTOR BOARD
Receiver
0.1–0.7 volts unblocked
11–13 volts blocked

Wiring Diagram for Individual Playfield Opto Switches

This diagram shows the wiring for individual playfield opto switches only. See page 3-19 for the wiring diagram for the Ball Trough Assembly opto switches.

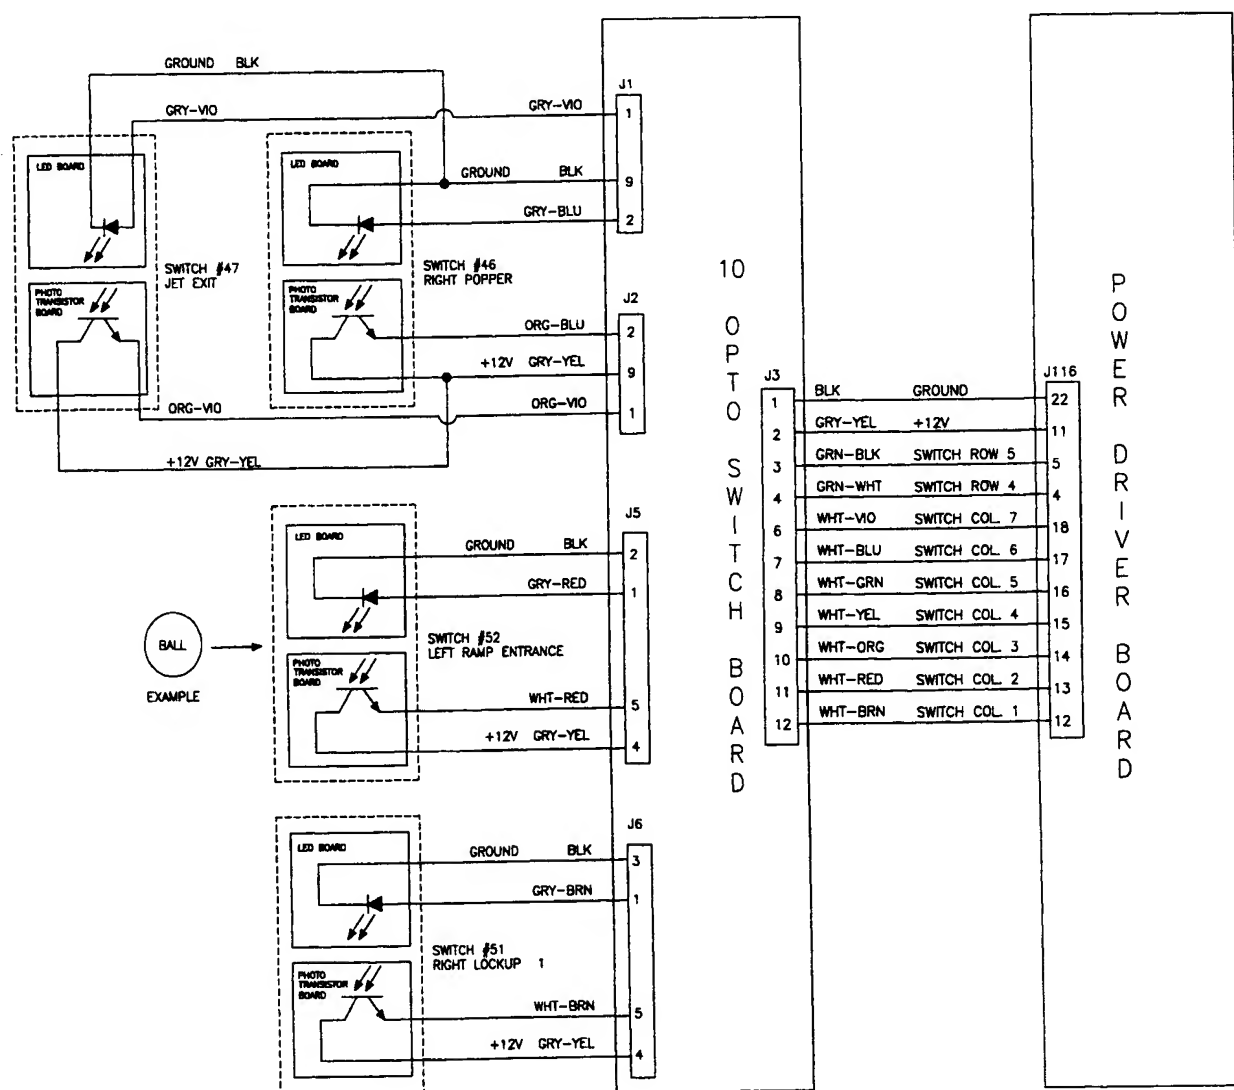

The individual playfield opto switches are:

- Switch #46 Right Popper
- Switch #47 Jet Eject
- Switch #51 Right Lockup 1
- Switch #52 Left Ramp Entrance

Each of these switches uses a green Individual LED board (P/N A-16908), and a blue Individual Photo Transistor board (P/N A-16909).

OPTO SWITCH OPERATION:

The ball rolls between the Individual LED board and the Individual Photo Transistor board and breaks the beam. The broken beam 'makes' the switch.

WARNINGS & NOTICES

WARNING

FOR SAFETY AND RELIABILITY, substitute parts and equipment modifications are not recommended. Use of Non-WILLIAMS parts or modifications of game circuitry, may adversely affect game play, or may cause injuries.

SUBSTITUTE PART OR EQUIPMENT MODIFICATIONS may void FCC/CANADA Type Acceptance.

BECAUSE THIS GAME IS PROTECTED by Federal copyright, trademark, and patent laws, unauthorized game conversions may be illegal under Federal law.

THIS 'CONVERSION' PRINCIPLE ALSO APPLIES to unauthorized facsimiles of WILLIAMS equipment, logos, designs, publications, assemblies, and games (or game features not deemed to be public domain), whether manufactured with WILLIAMS components or not.

NOTICE

WILLIAMS, Lane-change and Multi-ball are trademarks of WILLIAMS ELECTRONICS GAMES, INC. Entire contents of this manual © 1999 WILLIAMS ELECTRONICS GAMES, INC.

WARNING

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generated, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

RF Interference Notice

CABLE HARNESS PLACEMENTS and ground strap routing on this game have been designed to keep RF radiation and conduction within levels accepted by the FCC Rules.

TO MAINTAIN THESE LEVELS, reposition harnesses and reconnect ground straps to their original placements, if they become disconnected during maintenance.

FCC/CANADA STICKER. Check the back of your game to verify that an FCC/CANADA certification sticker was attached to your game at the factory. All games that leave the WILLIAMS plant have been tested and found to comply with FCC/CANADA Rules. Because the sticker is proof of this fact, legal repercussions to the owner and distributor may result, if the sticker is missing. If you receive a game that has no FCC/CANADA sticker, call WILLIAMS for advice or write us a note on your Game Registration Card. Be sure that the card bears your game's serial number.
